Subject: Glyphosate review - ORD comments on animal tox and genotox sections

Dana and Anna:

I understand that Danelle and Tom have worked back and forth with you in SharePoint on the epi work so nothing further on that here.

For the animal tox and genotox, the situation was a little different as folks were specifically commenting on the draft document and so they pulled drafts from SharePoint and edited in Word.

I am not seeing how to put them back in SharePoint, so we have Word documents for you....3 of the attachments are the draft document sections with comments and suggested edits...one each for Jeff, Ted and Nagu.

There are 3 more attachments that are short summaries of their comments.

Thanks for the extra time. Although folks didn't get to roll up their sleeves with you in evaluating the animal and genotox data, and they weren't able to do a thorough review, they did dive in, with a focus, and even looked at papers to the extent that they could.

I really hope this is helpful to you. We look forward to meeting with you next week. Thank you for setting up the meeting in advance. Much appreciated!

Lynn
